

TERRAPIN

ENERGY & ENVIRONMENT

Development Services

Terrapin Energy and Environment provides development services across the lifetime of a project, including a managed development platform. The proprietary, in-house developed, application assists with budgeting, assessment/evaluation, tracking, and general maintenance of a development pipeline. Services are built on decades of energy industry experience and further supported by a network of industry veterans. Terrapin offers flexible engagement structures, ranging from one-time deliverables through long-term consulting relationships with Terrapin optionally acting on behalf of your company. Please see an abbreviated list of services below:

- Site Identification and Assessment
- Budget Drafting and Tracking
- Financial Assessment
- Regulatory Review
- Engineering Services
- Interconnection Management
- Product Marketing
- Contract Negotiation
- M&A Consulting
- Utility Interfacing
- Owners Representation
